"Faster than Fiber and Better for Business"

BoiseWiFi offers fixed wireless broadband Internet for Business from \$4 / Mb. BoiseWiFi is an excellent choice as your primary business Internet service or as your backup, redundant, load- balance, failover, guest or conference room Wi-Fi Internet solution. Scalable from 50 Mbs to 10 Gbs.

Internet solutions for Business, Enterprise, Industrial, Healthcare, Education, Conference Rooms, Construction, Public Safety Internet & Guest WiFi.

5 Reasons Fixed Wireless is Better than Fiber Optic for Business

Lower Latency more hops and equipment links in optical networks lead to more latency and noise

Reliability a fixed wireless connection meets or exceeds the reliability of fiber optic networks

Fixed Microwave Wireless is Faster than Fiber and can easily achieve these speeds with higher reliability

Installation time fixed links can be installed within a few days in comparison to the weeks needed for fiber lines

Dependability many businesses use fixed wireless as a backup to minimize the risk of downtime

Business 50 (50x20)

A good starting point for your business Internet needs.
